LABOR MARKET REVIEW

Economic Growth Region 2

Statistical Data Report for June 2014, Released July 2014

Regional and State Unemployment (seasonally adjusted)

Regional and state unemployment rates were generally little changed in June. Twenty-two states and the District of Columbia had unemployment rate decreases from May, 14 states had increases, and 14 states had no change, the U.S. Bureau of Labor Statistics reported today. Forty-nine states and the District of Columbia had unemployment rate decreases from a year earlier and one state had an increase. The national jobless rate declined to 6.1 percent from May and was 1.4 percentage points lower than in June 2013.

June 2014 Labor Force Estimates (not seasonally adjusted)						
Area	Labor Force	Employed	Unemployed	Jun 2014 Rate	May 2014 Rate	Jun 2013 Rate
U.S.	156,997,000	147,104,000	9,893,000	6.3%	6.1%	7.8%

Labor Force Characteristics of Persons with a Disability, 2013

(Excerpted from the Bureau of Labor Statistics report released June 11, 2014)

In 2013, 17.6 percent of persons with a disability were employed, the U.S. Bureau of Labor Statistics reported recently. In contrast, the employment-population ratio for those without a disability was 64.0 percent. The employment-population ratio was little changed from 2012 to 2013 for both groups. The unemployment rate for those with a disability was 13.2 percent in 2013, higher than the rate for persons with no disability (7.1 percent). The jobless rate for persons with a disability was little changed from 2012 to 2013, while the rate for those without a disability declined. The data on persons with a disability are collected as part of the Current Population Survey (CPS), a monthly sample survey of about 60,000 households that provides information on employment and unemployment in the United States.

Highlights from the 2013 data:

Persons with a disability were over three times as likely as those with no ability to be age 65 and over.
For all age groups, the employment-population ratio for persons with a ability was less than half that of those with no disability.
In 2013, 34 percent of workers with a disability were employed part time, pared with 19 percent of those with no disability.
Fifteen percent of workers with a disability were employed in federal, state, or I government, similar to the share for workers with no disability (14 percent).
Employed persons with a disability were more likely to be self-employed than e with no disability.

Demographic Characteristics

Persons with a disability tend to be older than persons with no disability, reflecting the increased incidence of disability with age. In 2013, 46 percent of persons with a disability were age 65 and over, compared with 14 percent of those with no disability. Overall, women were somewhat more likely to have a disability than men, partly reflecting the greater life expectancy of women. Among the major race and ethnicity groups, the prevalence of a disability was higher for blacks and whites than for Asians and Hispanics.

Not in the Labor Force

Persons who are neither employed nor unemployed are not in the labor force. A large proportion of persons with a disability--about 8 in 10--were not in the labor force in 2013, compared with about 3 in 10 persons with no disability. In part, this reflects the fact that persons with a disability tend to be older than those without a disability and older persons are, in general, less likely to be labor force participants. However, for all age groups, persons with a disability were much more likely than those with no disability to be out of the labor force.

For the full BLS report on the labor force characteristics of persons with a disability in 2013 in pdf format including data tables, click the Internet link: http://www.bls.gov/news.release/archives/disabl-06112014.pdf
